

M2ARCHITECTURE

John Etherington

Drafting Technician

BIOGRAPHICAL DETAIL

A passion for computing saw John move from the construction industry into the architectural realm in July 1999.

During his early career, John spent 6 years performing highly technical and complex fabrication work for a major ship builder.

After retraining as an architectural technician, John specialises in CAD drafting and 3-D modelling and has worked on design development and documentation for a range of projects including school buildings, office tenancies and residential projects, ranging in size from small to \$multi-million.
