

Mackillop College

The site was originally a State owned primary school that has been altered, adapted and expanded into the College.

Originally planned as a 3-stream school, the School sought and gained approval to expand, first to 4-streams and recently to 5-streams requiring careful and creative use of areas and resources.

This practice has assisted in many buildings including a chapel, music & drama suite, library, cooking and fashion, computer classrooms, administration and staff facilities, gymnasium and recently a classroom building planned around a middle school concept.

Newly Completed work includes new public contact administrative offices and science expansion.

Structure: Gandy & Roberts P/L
Civil & Hydraulics: JMG P/L
Services: Kingston & Associates
QS: Kevin Collins
